Interface (UI) Design,

PROJECTS

Wikipedia Search Application (wikipedia application)
Unlock the vast wealth of knowledge on Wikipedia with a custom search application that delivers relevant and curated results. Quick and easy access to information has never been easier.
- Beautifully presented search results with HTML list elements, styled with CSS, Bootstrap, and a responsive design that adapts to any device.
- Seamlessly access information with the power of asynchronous fetch GET HTTP API calls and the ability to open the desired result in a new tab for further reading.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap

Home Appliances Repair Services (RepairPro Application)
An interactive online repair services application to enhance the user experience with personalized responses.
- HTML, CSS, and Bootstrap used to create a visually appealing UI for user interactions.
- Booking Form with Email Integration: Users can fill out a booking form, and their details are instantly sent to the service email for quick and efficient follow-up.
- Clean & Structured Code: Focusing on scalability and maintainability.

Technologies used: HTML, CSS, JS, Bootstrap

Todos Application (todos application)
A robust task tracking system with CRUD capabilities, crafted to simplify task management.
- Designed with HTML, CSS and Bootstrap to ensure a user-friendly interface for managing tasks.

- Dynamic UI updates through JavaScript event listeners and DOM operations for seamless CRUD operations.
- Secure task persistence through local storage methods, ensuring that tasks are never lost.

Technologies used: HTML, CSS, JS, Bootstrap
